ABOUT ME

Industrial engineer with over four years of experience in operational excellence and process improvement in high-volume manufacturing environments. Proven track record of leading Lean initiatives, optimizing material flow, improving process stability, and implementing KPI-based management systems. Extensive experience in facilitating Kaizen, standardizing processes, improving organizational culture, and fostering cross-functional collaboration to achieve measurable operational results.

WORK EXPERIENCE

ACADEMIC DEVELOPMENT COORDINATOR

Zitros Impulsa | Nov 2024 - Present

- Apply continuous improvement principles to optimize training systems and monitor participant performance.
- Design structured learning pathways aligned with competency-based development models.
- Develop and standardize educational content and training programs, ensuring measurable learning outcomes.
- Support certification and assessment processes, aligned with quality standards.

OPEX ENGINEER

Fisher & Paykel Healthcare S.A de C.V. | April 2024 - Sep 2024

- Led Lean initiatives (5S, Standard Work, Kanban) improving process stability and operational discipline.
- Standardized key processes enhancing KPI visibility and decision-making across operations.
- Supported Shingo Institute preparation, aligning processes with operational excellence standards.
- Identified process inefficiencies and contributed to continuous improvement initiatives.

OPEX ENGINEER

HP | Poly / Plamex | Jun 2022 - April 2024

- Development and implementation of organizational systems using the Shingo model to align purpose and behaviors at all levels.
- Execution of Kaizen events focused on waste reduction and flow optimization in value chains.
- Implementation of Kanban systems to reduce material shortages and improve supply flow.
- Design of visual management tools to improve operational performance monitoring.
- Application of Lean methodologies (VSM, 5S, Standardized Work) to improve process efficiency.
- Support in root cause analysis initiatives to address operational problems.

OPEX INTERN

Fisher & Paykel Healthcare S.A de C.V. | Aug 2021 - Apr 2022

- Supported implementation of Lean tools including 5S, VSM, and DMAIC.
- Participated in Kaizen events improving workflow efficiency.
- Assisted in process documentation and standardization efforts.

EDUCATION

Universidad IBERO

INDUSTRIAL ENGINEERING

CERTIFICATE

- Shingo Model – Full Track (Discover Excellence, System Design, Continuous Improvement, etc.)
- Project Management.
- Training Instructor Certification

CORE COMPETENCIES

- Lean Manufacturing
 - Kaizen
 - KPI Management
 - Process Standardization
 - Root Cause Analysis
- Value Stream Mapping (VSM)
 - 5S
 - Kanban
 - Process Improvement |
 - Continuous Improvement

ADDITIONAL INFORMATION

- US VISA – Sentri English: Professional working proficiency (technical documentation and operational meetings).
