Objective Work as an Electrical mechanical Engineer structural and design engineer,
automation and manufacturing

Skills •

Experienced in ProE, SolidWorks, AutoCAD, ANSYS, CATIA,
Autodesk Fusion 360, Autodesk Inventor
COSMOS and FEA software; in addition to Microsoft
Applications.

- Lab experience include Acoustics, Fluid Mechanics and Fluid Simulation, Structural Mechanics Simulation, and Automation/Robotics
 - Trained for High Frequency welding Machines at KIEFEL Company, at Freilassing, Germany
 - Have worked and used theories about acoustic frequency Response, and theories about transport phenomena Electricity and viscous plastic fluids
 - Creative, demonstrated strong team and communication skills.
 - CNC Wood cutting experience for sony, polk audio, Bose, speakers, And cabinets.
-

Work History

Inventus power

Machine maintenance supervisor engineer and automation

October 2024 to January 2025 (temporary)

machine maintenance, laser welding, automatic machines, electrical test, ultrasonic machines,
flow test, leak test machines, maintenance program, preventive corrective.

Technology and Steel Company October , 2023— Feb 2024 (Temporary)
manufacturing engineer, Tooling engineer and design, machine maintenance working with AutoCAD,
Solidworks, structural analysis, steel laser cutting, and bending machines, welding Tig and Mig,
design, and process improvement. machine maintenance, lean manufacturing. test engineering

June 2023-August 2023 temporary Bazz Houston.

Tooling Engineer (Tooling) progressive die design, and animation, Solidworks drawing, AutoCAD, structural calculation.

tooling quotes, tool improvement, metal mechanical company.

Optical comparator measuring, Keyence measuring equipment, Sheet metal Laser cutting and bending machine, experience.

Nov 2016-June 2023 SOUTHWEST FABRICATORS, Tijuana, Mexico

Working as a Product and Design Engineer, at the Engineering Department SolidWorks 2010, AutoCAD 2010, and Autodesk 3D Fusion 360, 3D printing FEA analysis, hydraulic presses and welding machines product design and manufacturing, BOM, design and simulation and animation. AMADA Laser cutting machines for steel and plastic, mold design pneumatic design and control, machine design and product design, plastic and prototypes, pneumatic control design, for assembly process, automation design and control systems, new product design and introduction, and medical devices, PLC programming mitsubishi and Allen Bradley, HMI and PLC programming, electro-pneumatic maintenance, machine automation and maintenance.

2015-2016 TRUE BLUE, Tijuana, Mexico

Working as a Design Engineer, at the Engineering Department SolidWorks, AutoCAD, finite elements analysis software, working with laser cut machines for carton and plastic sheets, pad print, Solidworks design and simulation and animation, AutoCAD new product design and product improvement, work with laser cutting machines and 3D printers.

2015-2016 CST, Tijuana, Mexico

Working as a Design Engineer and product Engineer, at the Engineering Department, ESD tests for automobile sensors, life and cycle test for automobile sensors, project management and product improvements, solidworks 3D design and FEA analysis, minitab, engineering reports, engineering tests.

2010-2014 THERMOFISHER SCIENTIFIC, Tijuana, Mexico

Working as a Product Engineer, at the Engineering Department

SolidWorks 2010, AutoCAD 2010, Cosmos finite elements software, and project management, 5's.

I also coordinate mold design, plastic parts, plastic molding processes,

Worked with SolidWorks 2010 and AutoCAD 2010 design, structural, thermal and fluid FEA finite element analysis, to laboratory tips pipettes, used in research laboratories, worked with Project reports timelines, Project status, to my boss in Microsoft Project, and product documentation, Using DOE (design of experiments) to improve product and assy process, working with injection molding machines and blow molding machines, process and molds, and plastic part design, pad print.

2007-2009 PALL MEDICAL, Tijuana, Mexico

Worked as a Maintenance Supervisor

In charge of 16 technicians and all production floor machines, including KIEFEL Radio Frequency welding machines, preventive maintenance, corrective improvements, PLC, Allen Bradley, turntable machines, plastics, PVC (training RF welding machines in Germany), and others.

Worked with Radio Frequency machines Thermatron and Kiefel, PLC's and Automation, Automatic machines, Servo Motors, Spectrometers machines, and others, pad printing.

2004-2007 PLANTRONICS, Tijuana, Mexico

Working as a product design Engineer

Proe-3.0, 2.0 AutoCAD, ANSYS finite elements software, and project management, 5's.
Also small rubber molds and Snaps, plastic parts and advanced surfaces designs.
Handled plastic molding processes. Used SLA prototype machines.
Worked with ProE and AutoCAD design, researched in acoustic labs, conductive polymers for transducers, and stereo-lithography machines for rapid prototyping. Acoustics experiments with porous media.

2003-2004 HUDSON RESPIRATORY, Tecate, Mexico

Worked as Sr. Mechanical and Maintenance Engineer.

In charge of production, facilities and machine shop, plus transfer projects for breathing sys. exerciser, project, validations IQ, OQ, PQ (protocols in English). Working with ISO9000, FDA, TUV and QSR, Quality standards. Also Lean

Manufacturing, Ultrasonic welders, Branson, Sonic Material improvements. Worked with plastics ABS, PVC, polycarbonate, Acrylic; and Projection measuring machines, plus adhesives and solvents (Ciclohexanone, Ciclopentanone) locktite. Failure analysis, FMEA, DOE in six sigma standrs. UV curing process, and corrective and preventive maintenance, Blow molding, intention molding machines.

Extrusion machines, failure and correction analysis, Automática machines, Allen Bradley PLC Mitsubishi, AutoCAD 2000i, Technicians management, step motors, servomotors, drives, electrical and Mechanical improvements, pneumatic and hydraulic systems

Water treatment projects, compressor and vacuum systems for resins of the injection molding machines, electrical installations; including preventive maintenance specifications.

Worked with PLC's and Automation, Automatic machines

Servomotors, Blow molding and injection molding machines, and maintenance.

2002-2003 NELLCOR TYCO, Tijuana, México

Worked as Manufacturing Engineer

3 transfer projects stopcocks, syringes, AIST medical systems project, and validations IQ, OQ, PQ (protocols written in English). Working with ISO9001 and FDA and TUV and QSR, Quality standards. Improvements with Lean Manufacturing in productivity, leading to \$220, 000 dollars in annual savings.

Worked with Ultrasonic welders- Branson, plastics ABS, PVC, polycarbonate and Acrylic. Performed projection measuring machines, Failure analysis, FMEA, DOE with six sigma standards. Adhesives and solvents (Ciclohexanone, Ciclopentanone) locktite UV curing process, and preventive maintenance specifications.

Worked with Product Line transfer, automatic machines, silicone extrusion machines for medical industry, DOE analysis, and product design improvement.

1997-2002 R/D ENTERPRISES, Downey, CA. U.S.A.

Worked as a Design and Manufacturing Engineer

On items such as irrigation valves, and devices, new product

Development and design, Pro-E 3D drafting and AutoCAD 14, 2000. Jiggs and fixture design to improve process, working with manufacturing cell balance, Ultrasonic welders. Worked with plastics ABS, PVC, polycarbonate, projection measuring machines, FMEA, DOE analysis, adhesives and injection and blow molding. Maintenance, process, and improvements on resin heaters, mills, machine vacuum resin systems.

Worked with PLC's and Automation, Automatic machines

Servomotors, Injection molding and Blow molding Machines and mold design. 1996- 1997

SANYO VIDEO COMPONENTS, Tijuana, México

Worked as a Design and Manufacturing Engineer

Pilot runs, introduction of new products, and Line balance (ready work factor). Solid Works 3D, MicroCADAM, computer drafting and visual aids specifications.

Transformer FBT calculations, laboratory life tests.

Measuring equipment, oscilloscope, multimeter, ohmeter, amp, etc. Jiggs, fixtures pot soldring, wave soldering SMT machines PLC programming, Omron PLC to improve process

ISO9001, standards engineering changes

CNC measuring machines and projection (Mitutoyo)

Worked with PLC's and Automation, Automatic machines, and Servomotors. 1993-1996 LAUREL INTERNACIONAL S.A., Tijuana, México

Working as a design engineer

Conveyor calculations and drafting (manual and AutoCAD 12 and 13) Hoppers, Iddlers, screens for the mining Industry

Worked with Structure calculations and AutoCAD structural designs. Education

Degrees and Diplomas

2006-2009 Mechanical Design with Specialty in Continuum Mechanics, M.S. UABC CICESE

1998 Diploma in Automation and Robotics FESTO

and Instituto Tecnológico de Tijuana

1990-1995 Electromechanical Engineering B.S.

Instituto Tecnológico de Tijuana

Seminars

2004 Lean Manufacturing (Diploma awarded).

2003 "General Polymers" Plastics Processing (Irvine CA. U.S.A.) 2002 "One Source" Sensors Seminar (Tijuana)

2000 Solid Works 3-D Drafting (San Diego CA. USA)

2000 CNC Machines (Tijuana)

2000 CNC and Projection Machines for Measurement.

Specialized Courses

2007 PRO-E WILDFIRE 3D SOFTWARE COURSES,(Canadian training)

2007 ADVANCE SURFACES COURSES ,(Canadian training)

2007 DESIGN FOR MANUFACTURING COURSE (Santa Cruz CA. USA) 2008 RF welding for Kiefel machines in Freilassing Germany. 2011 CFD solidworks training for fluid dynamics and thermal 2015 Graduate school CICESE PhD program for fluid dynamics in porous media

Wave propagation, advanced math, structural geology, reservoir simulation software, elasticity, geothermal engineering, porous media physics.
