

LUIS CARLOS CARDENAS NOMURA

Tijuana, Baja California | (646) 245-9479 | Luisccn93@icloud.com

PROFESSIONAL SUMMARY

Industrial Engineer with more than 5 years of experience in manufacturing, process optimization and supply chain. Proven track record of increasing **operational productivity by 50%** and improving **product availability by 70%** through the design and implementation of customized **automated MRP** systems. Expert in the use of Lean Manufacturing (VSM, Kaizen, 5S) and standardized documentation (APS, OTS) to eliminate waste and reduce Takt Time. Technical design specialist using **SolidWorks and AutoCAD**, achieving a **30% reduction in operating costs**. Bilingual professional focused on organizational efficiency, quality standards and strategic growth.

WORK EXPERIENCE

Operations Coordinator | Sr. Foods Tijuana, B.C. | 01/2025 – Present

- **Process Optimization:** Implementation of VSM, Kaizen and 5S methodologies to standardize workflows, achieving a **50% increase in operational productivity**.
- **Systems Development:** Design and launch of an **automated MRP system** and an auxiliary sales control system, increasing the availability of product for sale by **70%**.
- **Cost Reduction:** Execution of logistics cost analysis through VSM, achieving a **30% reduction in operating costs** and direct savings of 2% per delivery.
- **Inventory Management:** Optimizing warehouse operations and material handling, reducing scrap rate to 5% and improving overall inventory accuracy.
- **Quality and Strategy:** Collaboration with executive management to improve service levels, increasing customer satisfaction by 15% compared to the previous fiscal year.

Manufacturing Engineer | Hyundai Translead Tijuana, B.C. | 10/2019 – 10/2024

- **Technical Design:** Project management focused on the **design of Jigs and Fixtures** using SolidWorks and AutoCAD, optimizing Takt Time and production flows.
- **Documentation and Standardization:** Development of critical technical documentation, including **APS** (Assembly Process Sheets) and **OTS** (Uptime Standards) to ensure process repeatability.
- **Process Engineering:** Use of **UPGVC** (Uniform Part Group Variant Codes) and Lean methodologies to solve complex technical challenges in multidisciplinary teams.
- **Technology Deployment:** Support in the launch of innovative technologies and specialized production equipment in high-volume assembly lines.
- **Data Analysis:** Conducting efficiency studies using Takt times to identify bottlenecks and implement continuous improvement strategies.

EDUCATION

Bachelor's Degree in Industrial Engineering Universidad Autónoma de Baja California (UABC), FIAD | 2013 – 2019

CERTIFICATIONS

- **Warehouse Management and Inventory Control (Certification)** | 2026.
- **Six Sigma White Belt (Certification)** | 2023.
- **Value Stream Mapping (Certification)** | 2019.
- **Lean Enterprise Systems Program (Certification)**, University of Tennessee | 2018.

SKILLS

- **Software:** SolidWorks, AutoCAD, MiniTab, Excel Avanzado.
- **Engineering & Operations:** Jig & Fixture Design, Layout Design, Space Utilization, Cost Estimation, Powder Coating.
- **Core Competencies:** Continuous Improvement, Lean Manufacturing, Process Optimization, Quality Control, Workforce Planning.

LANGUAGES

- **English:** Fluent.
- **Spanish:** Native.
